

Devoted to the Strength of Family.

Our commitment to excellence depends on the growth and success of your family. Simply put, we know your children deserve the best support.

Our Targeted Case Management program is child-centered, family driven, and community based. We understand that each person faces different challenges and we want to work with them by creating a plan of action targeting their specific individual needs.

As life happens, childhood trauma can occur and is due to no fault of their own. The result of of this is the developmental of dysfunctional behaviors. Children and adolescents exposed to physical, emotional, sexual abuse and/or neglect develop negative coping strategies inhibiting them from achieving their full potential.

A child's healing and successful living are dependent on his/her resiliency and healthy coping skills.

2Ingage's high quality service is...

MENTAL HEALTH TARGETED CASE MANAGEMENT SERVICES

INspire. INform. INgage.

What We Do

Empower Children & Families

Our life skills programs are evidence and community-based. Targeted Case Managers (TCM's) partner with children and families utilizing nationally recognized tools accomplishing maximum resiliency and healthy coping strategies in children and families. Our TCM's will provide targeted case management and rehabilitation skills training which integrate wraparound principles for children and families.

Enhance the Health & Well-Being of Every Child

Our TCM's are community advocates who identify the child or adolescent's strengths and needs and help develop a plan of action to address these needs. TCM's find the appropriate services available within the community for children and families to use and help maintain the benefits of these services.

Advocate for Your Child

TCM's help your children and family safely work through life's challenges even if every day feels like another crisis, keeping your children safe at home or school as needed. Our vision is that every child or youth receiving Targeted Case Management and Skills Training from 2Ingage will discover and achieve their fullest potential.

Our Guiding Key Principles:

- All children have potential that can be developed.
- Every child's needs are different and matter.
- Our emphasis is on individual strengths rather than symptoms.
- We focus on the social model instead of the medical model.
- Our focus is on the present instead of fixating on the past.

**WE FOCUS ON
RESTORING HOPE,
BUILDING FUTURES &
CHANGING LIVES SO
EVERY CHILD FEELS
EMPOWERED, ENGAGED,
& SUPPORTED.**

Every child matters when it comes to Community Participation, Family Belonging, & Wellness.

We utilize evidence-based and nationally recognized tools. While working together, we will assess your child's strengths and needs developing a personalized plan ranging from one hour to several hours per week based on the results of your child's assessment.

Targeted Case Managers...

- Partner with your family to work through challenges and attain the goals set on the family's service plan.
- Advocate for your child's mental health needs.
- Build strategies to handle challenging behaviors and situations.
- Manage stress and frustrations.
- Track your child's development in treatment.
- Check on your child's school progress.
